PI-XX Line input isolator

- Eliminates hum and buzz caused by ground loops
- Delivers exceptionally low distortion down to 20 Hz
- Ruler flat frequency response from 5 Hz to 40 kHz
- Plug and play easy to use, no power required

The Iso•Max PI-XX is a single channel line input isolator designed to eliminate noise in professional balanced audio systems by isolating the input of the connected device.

The design begins with an extruded aluminum case that comes standard with gold plated XLR connectors. Plug and play easy to use, this passive interface does not require any power to work. Inside is a high performance Jensen transformer that is able to withstand signal levels to +19 dBu at 20 Hz without discernible distortion. This provides galvanic isolation between the input and output to eliminate hum and buzz caused by ground loops, rejecting noise by as much as 124 dB.

You simply connect the PI-XX between the source and the input destination to eliminate ground loops, electromagnetic interference (EMI) and RFI problems. The PI-XX will quietly go to work without introducing distortion, phase shift or artifact of any kind.

Applications

PI-XX with a PA system
Eliminating noise in a PA system can take hours of trouble shooting, particularly when the mixer, amplifiers and speakers are distanced apart. Connect the PI-XX at the input of your amplifier to eliminate ground loop hum and buzz.

PI-XX in the studio
Recording and broadcast studios require a noise-free signal transfer while delivering the most accurate sound possible. The Iso•Max PI-XX eliminates ground loops and lowers RF without introducing distortion, phase shift or artifact.

Dimensions

- (Front)
  - 2.0” (50.8 mm)
  - 3.0” (76.2 mm)

- (Top)
  - 3.0” (76.2 mm)

- (Bottom)
  - 0.5” (12.7 mm)
  - 1.5” (38.1 mm)
  - 2.625” (66.7 mm)
  - 2.645” (67.2 mm)
  - 0.375” (9.5 mm)

All Holes = 0.156” (3.96 mm) DIA x 0.3” (7.62 mm) 82 Degree C.S.

Connector options

The PI-XX comes standard with XLR input and output. It is also available special order with the following connector configurations for use with both balanced and unbalanced systems.
**ISO·MAX®**
